Product Description

STIHL BGA 300 Battery Powered Backpack Blower (Unit Only)

This high performance, commercial-grade backpack blower features long run times and the STIHL Noise Reduction System.

The BGA 300 battery backpack blower offers powerful performance and commercial-grade durability. It features the STIHL Noise Reduction System with long run times and little-to-no maintenance for efficient operation. With its high-performance brushless motor, the BGA 300 delivers a powerful 26-Newtons blowing force and 192-mph air speeds for heavy-duty clearing of both dry and wet debris in a virtually maintenance-free package. When paired with the AR 3000 L backpack battery, the BGA 300 delivers up to 61 minutes of performance. Or for a lighter load, pair the BGA 300 with the ADA 1000 and two AP batteries to power through your workload.

Three power levels plus a boost mode improve battery efficiency for consistent, long-lasting power throughout the battery charge. Modeled after its gas counterparts, the BGA 300 gives you a robust and durable design while also providing a comfortable, ergonomic use. Additionally, the STIHL Noise Reduction System provides 360-degree noise reduction that is perfect for noise-sensitive areas.

Run time may vary depending on usage and application.

This tool is IPX4-rated weather-resistant construction and has been designed and tested for splash water protection.
