Product Description

STIHL BRA 500 Battery Powered Backpack Blower (Unit Only)

As strong as a hurricane but capable to work in noise reduced areas, the BRA 500 packs a punch on wet leaves and debris.

The BRA 500 battery-powered blower, compatible with the AP 500 S battery, features an exceptional power-to-weight ratio for heavy-duty work and optimal operator comfort. The rotary motor with Noise Reduction System allows users to operate in noise-sensitive areas. The HMI display puts diagnostics and applications like cruise control right at your fingertips. With four speed levels including Boost and ECO modes, this blower offers customized performance and constant power, with no drop-off in power across the life of the battery in standard mode. Comfort features like cruise control and the three-point harness with optional lap belt help optimize operator comfort. Engineered with IPX4-rated weather-resistant construction, this powerhouse is designed and tested for splash-water protection.
