Product Description

STIHL MS 462 C-M Chainsaw - 28"

This chainsaw combines optimum torque, power, and weight with the performance benefits of STIHL M-Tronic™ technology.

Meet your ideal business partner—the STIHL MS 462 C-M chainsaw—specially engineered for the professional who desires more power with less weight. At just over 13 pounds, the MS 462 C-M is the lightest-ever STIHL chainsaw produced in its fuel-powered class and thus reduces the fatigue you experience in daily forestry work. It features an excellent power-to-weight ratio for added maneuverability tested by professionals in the field. The next generation STIHL M-Tronic™ engine management system electronically controls ignition timing and fuel metering. Conveniently, the saw auto-adjusts for changes in its operating environment, such as changes in altitude and fuel quality, for optimal performance. As an added measure to reduce vibration and user fatigue, the anti-vibration system is designed for good handling when the MS 462 C-M is equipped with longer guide bars.
