Product Description

STIHL SEA 100 Battery Powered Wet/Dry Vacuum

SEA 100 L battery wet/dry vacuum: easy, flexible cleaning for home, hobby, and work

The first battery-powered wet/dry vacuum in the STIHL AP System lineup, the SEA 100 is a long-lasting tool with a compact design to optimize maneuverability and portability during tasks. Equipped with ECO mode, this wet/dry vacuum improves battery life by up to 35% on smooth surfaces or low power applications. The SEA 100 was built with high suction pressure to provide a consistent, powerful cleaning performance and a 7.8 ft. hose to provide users with a long reach while taking on the job at hand. With engineered wheels designed not to leave marks and an automatic shutoff to help prevent fluid from entering the motor, this powerful vacuum is ideal for mid-range to pro users in need of a tough tool with long-lasting, reliable performance.
