Product Description

STIHL SGA 30 Battery Sprayer

Built for convenience and performance—no pumping required.

The STIHL SGA 30 makes landscape care easier and more efficient. Designed for homeowners and garden enthusiasts, this sprayer eliminates the need for manual pumping and delivers steady pressure for even application of pesticides, herbicides, fungicides, and insecticides.

Adjustable pressure settings from 22 to 36 psi allow users to customize spray output for different tasks, from delicate plants to tough weeds. Powered by the STIHL AS 2 battery, the SGA 30 can run up to 30 minutes on a single charge, covering up to seven full 1.25-gallon tanks. Its smart energy-saving feature automatically shuts off when idle or empty, helping conserve battery life and extend the sprayer's durability.

The SGA 30 is also compatible with existing STIHL nozzles and accessories, making it easy to upgrade without replacing your gear. Lightweight and comfortable to use, it's the ideal tool for anyone who wants professional-level results with less effort.
